

## CPSN Mission Statement-

The Changes Parent Support Network (CPSN) empowers parents and communities experiencing destructive, violent, and out-of-control adolescent behavior. We achieve this through structured self-help support and educational programs that promote positive behavioral and cultural changes.

## CPSN Vision Statement:

CPSN will grow; it will support, educate, and empower parents. It will do this through the CHANGEinsight Program for Families and by working in cooperation with community resources. Over the next five years we will grow at least statewide. We will publish program materials to encourage growth. We will establish an annual forum to identify, discuss, and help resolve issues of importance to parents with troubled and/or acting-out children.
